

# HYDRO STONE

STRONG AND STYLISH SPC

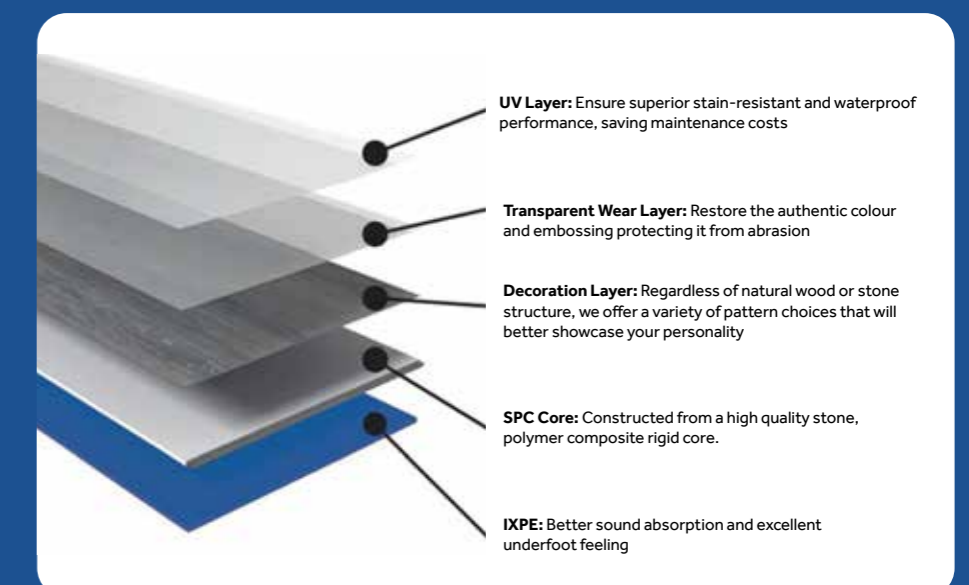

A FLANAGAN FLOORING EXCLUSIVE

## WHAT IS SPC VINYL FLOORING?

**SPC is the latest in Flooring technology. It cleverly blends the aesthetic benefits of wood with the practical benefits of stone to create a unique vinyl plank.**

SPC stands for stone plastic composite. This means that SPC vinyl plank flooring is engineered through a combination of limestone and stabilisers, contributing to a distinctly durable core. Characterised by its several layers, SPC vinyl flooring not only boasts all the functional and aesthetic benefits of standard vinyl floor tiles, but actually enhances them through a rigorous practical design.

# HYDRO STONE

## 6.5mm THICKNESS

This click vinyl flooring is constructed from a high quality stone, polymer composite (SPC) rigid core.

## CLICK TOGETHER FITTING SYSTEM

Making it quicker, easier to install and DIY friendly.

## 0.55MM SUPERIOR WEAR LAYER

Heavy-duty performance for high traffic areas. Providing resistance to scratches or impacts.

## 100% WATER PROOF

Easy-to-clean, worry-free planks suitable for kitchens, bathrooms, living rooms, bedrooms, dining rooms and studies.

## UV STAIN RESISTANT

UV Protect and ceramic bead coating reduces discolouring or staining.

## 1.5mm IXPE UNDERLAY PAD

Attached anti-bacterial padding lines each plank for boosted comfort and sound insulation.

## HIGH-DEFINITION VISUALS

Remarkable realism and texture, using the latest visual imaging technology.

## SUITABLE WITH UNDERFLOOR HEATING

Can be installed over hydronic radiant heating systems. Installation over electric radiant heating system will not be covered by warranty.

## BUILT TO LAST

Backed by a 20 year residential and 5 year commercial wear warranty for long-term peace of mind.
